## **DETAILED ACTION**

### ***Claim Objections***

1. Claim 1 is objected to because of the following informalities: "idium" should be "indium". Appropriate correction is required.

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Hatori et al. (US 6,156,433).

Regarding claim 1, Hatori ('433) teaches in figures 6A-6E and in column 31, line 8 through column 32, line 61, a method for forming a back plate for a display composing the steps of: forming an indium tin oxide (ITO) layer on a substrate; patterning the ITO layer with resist material to form etch protected areas to define electrode lines; etch the ITO in areas are protected by etch resist; and forming light separating material in recesses between electrode lines.

Claim 2 is rejected under 35 U.S.C. 102(b) as being anticipated by Ryu et al. (US 5,507,404).

Art Unit: 2879

Regarding claim 2, Ryu ('404) teaches a method of forming a faceplate for a display, composing the steps of: forming light separating material in a substrate to define color filter lines, forming color filter in areas between the light separating material with each color filter having a height greater than the light separating material; forming an indium tin oxide (ITO) layer over the color filters and light separating material; placing etch-resist on the color filters; etch the ITO from the recesses between the color filter over the light separating material.
